# QuickSlide for PowerPoint

Facts for IT departments

QuickSlide: Quality, branding and productivity in PowerPoint

- The PowerPoint add-in with real added value for companies and users
- Seamlessly integrates into PPT and your IT infrastructure
- Maximum usability
- Certified by Microsoft

Content well organized

- Organizes the company's presentations and graphic elements
- Automatically updates old slides in presentations
- Integrates DAMs and media/image databases
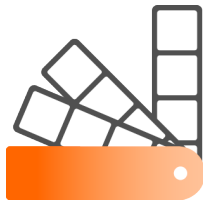

Branding fully consolidated

- Ensures your slide masters are used correctly
- Integrates your corporate design into all functions
- Checks and corrects deviations from corporate design

Presentations easy to create

- Automatically creates agendas, Gantt charts etc.
- Simplifies formatting, converts 4:3 to 16:9
- Fully automates data-driven presentations
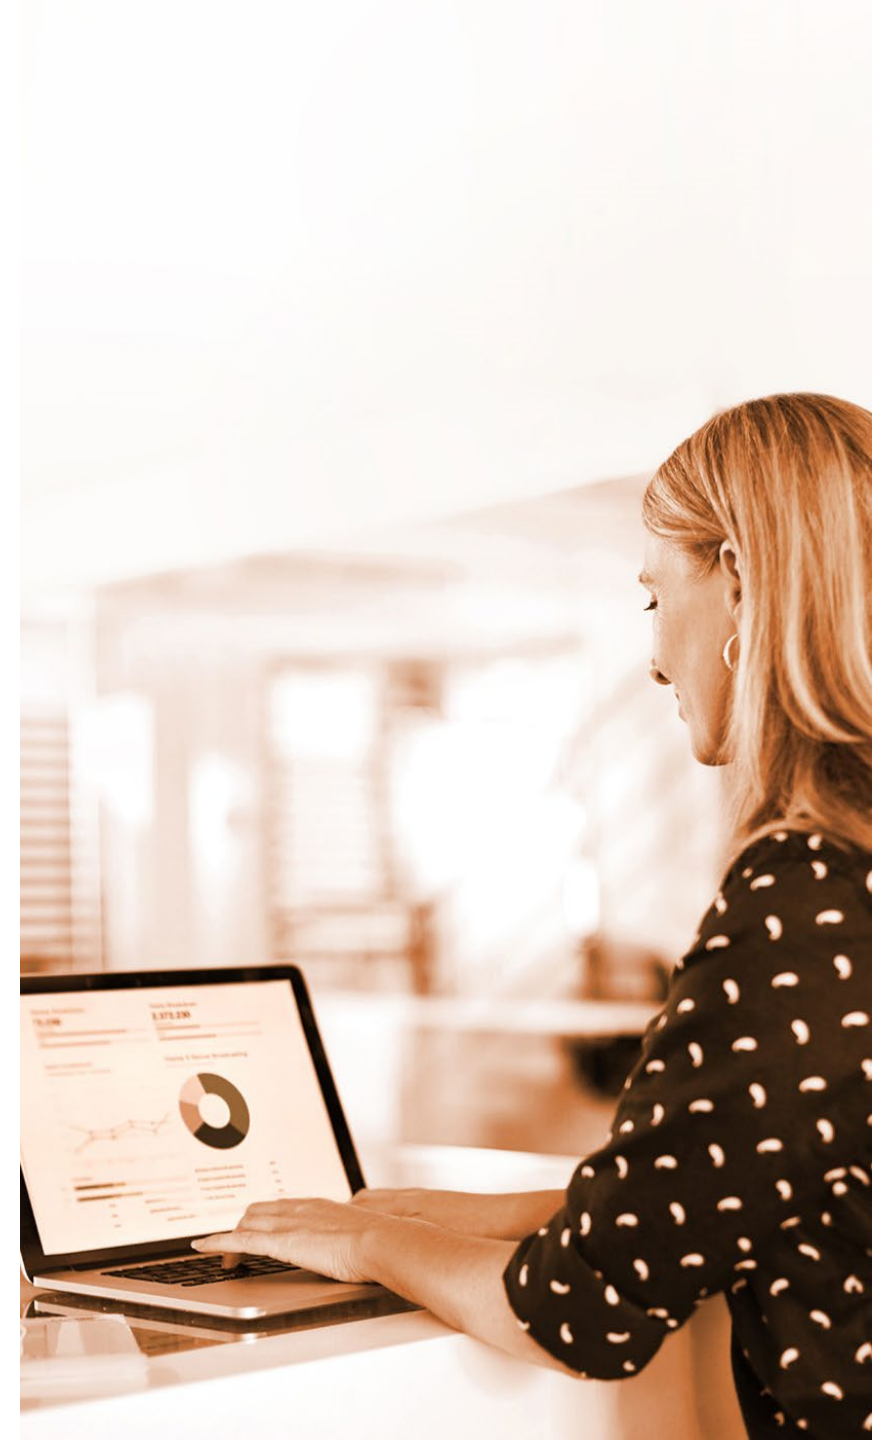

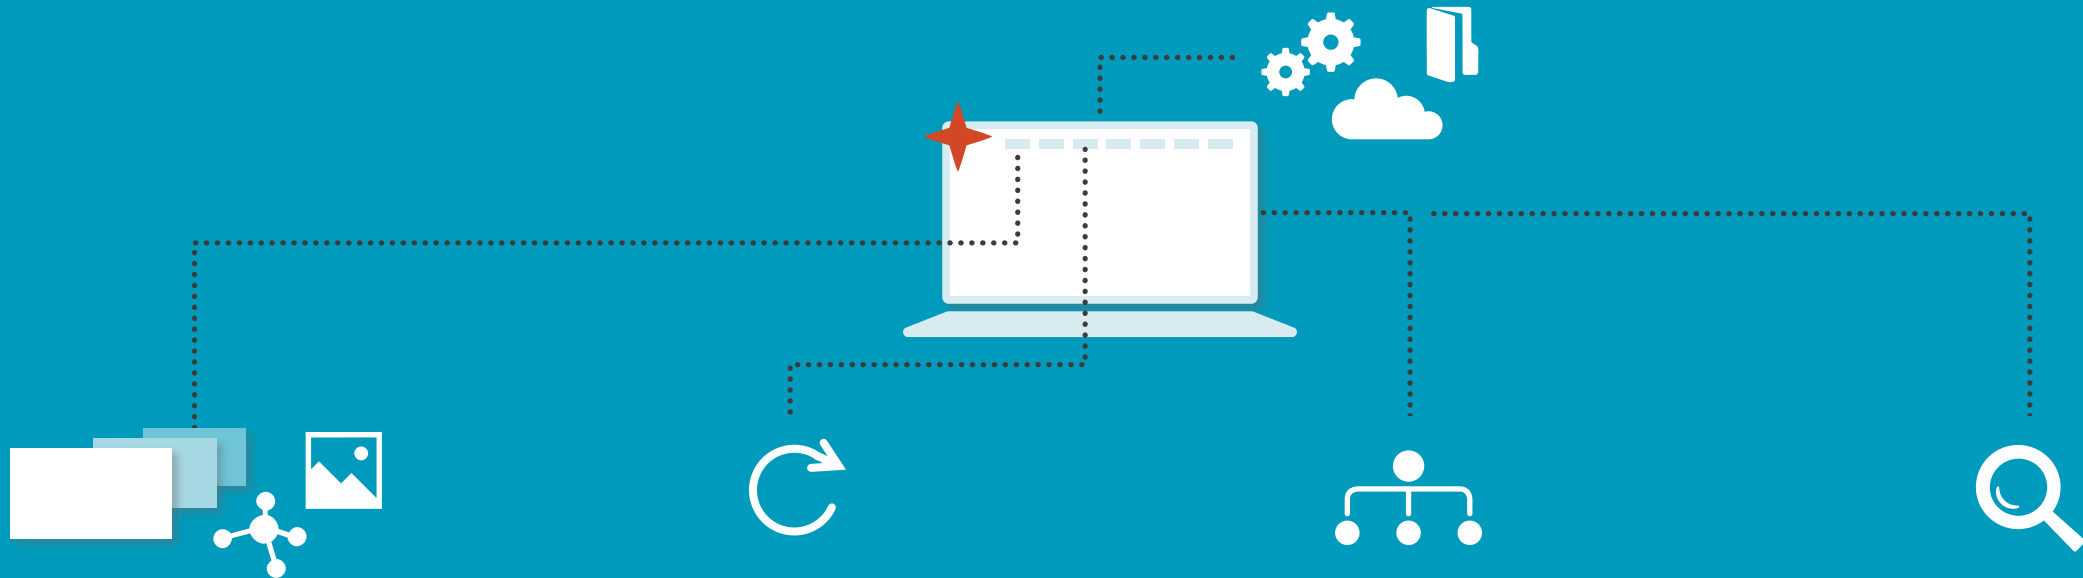

Access anywhere and from any device

QuickSlide with cloud-based Asset Library:

- all slides, presentations and templates centrally in one place
- location and device-independent use as an add-in directly in PowerPoint (Windows, Mac, iPad) or via the web browser

How to manage PowerPoint assets without the need for IT intervention

All assets at your fingertips:

QuickSlide makes your templates, slides and graphic elements available on all devices. DAM systems can be integrated.

Always up to date:

Departments update and maintain content independently. Employees have immediate access to the latest content versions; old presentations are kept up to date.

Manage access rights:

User roles and access rights can be easily controlled via QuickSlide Admin App, of course with connectivity to your Azure Active Directory.

Fast search function:

Employees find relevant content quickly thanks to a clear visual structure and handy search functions.

Future-proof web technology

One solution for all platforms

All users benefit – whether on Windows, Mac or tablet.

Fast innovation intervals

Continuous updates of the web add-in without separate roll-out processes.

Content management in Azure

GDPR-compliant content management in Microsoft Azure.

Easy user management

Convenient management of users and access permissions via admin web app.

Secure and scalable platform on Microsoft Azure

Data Security

- Microsoft Azure is ISO 27001 and PCI DSS certified

- Data at rest is encrypted with Azure System Managed Keys, data in transmission is encrypted with TLS

- No access to customer data via the public Internet
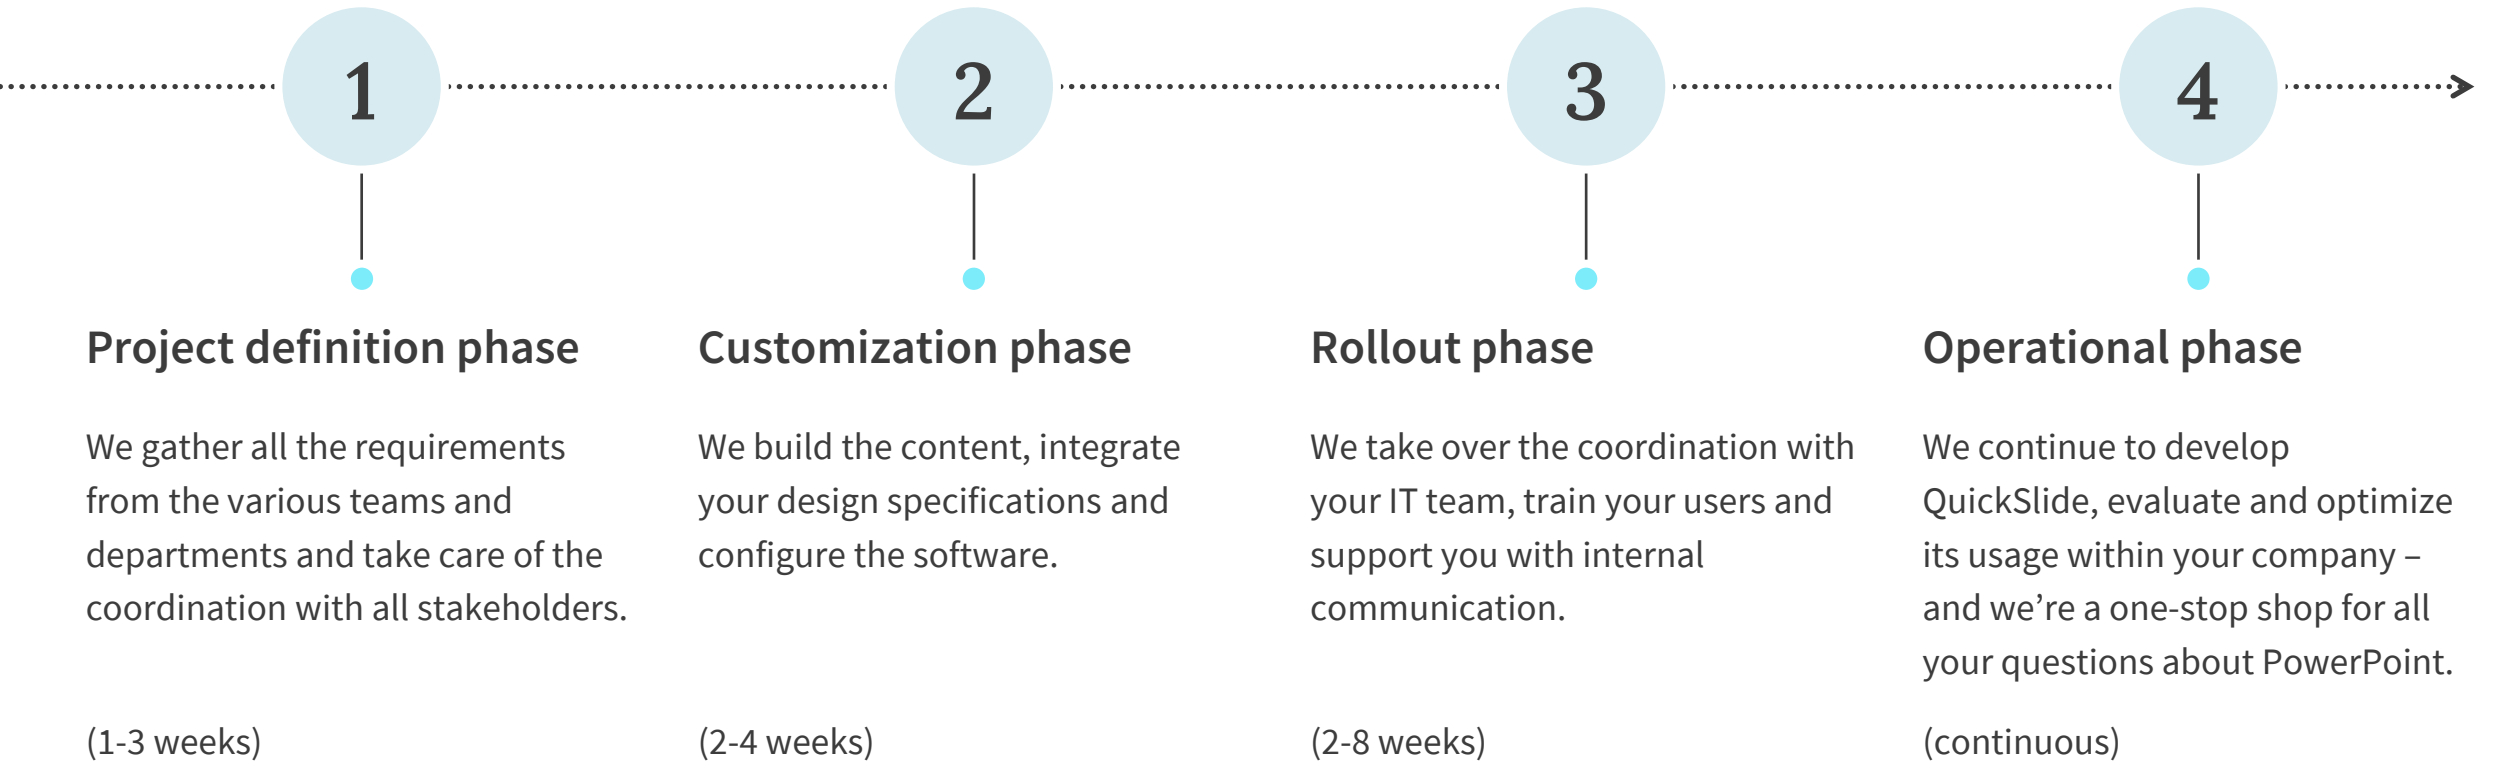

Access and data isolation

- Multi-tenant architecture with logical separation of data between different tenants

- Single sign-on with Azure Active Directory

- Multi-level authorization concept for user management

Performance

- Azure Cloud is highly elastic and can scale as needed

- Microsoft Azure offers SLA of 99.95% for Kubernetes (website and API) and 99.99% for data storage

Structured project workflow

1

Project definition phase

We gather all the requirements from the various teams and departments and take care of the coordination with all stakeholders.

(1-3 weeks)

2

Customization phase

We build the content, integrate your design specifications and configure the software.

(2-4 weeks)

3

Rollout phase

We take over the coordination with your IT team, train your users and support you with internal communication.

(2-8 weeks)

4

Operational phase

We continue to develop QuickSlide, evaluate and optimize its usage within your company – and we're a one-stop shop for all your questions about PowerPoint.

(continuous)

The QuickSlide licensing system

The basics:

Includes customization of QuickSlide for your company

....

The setup is calculated as a one-time charge. This includes all costs up until the successful rollout:

- Consulting
- Graphics kit in your corporate design
- Software customizing
  - Adaption to your IT systems
  - Integration of your corporate design in all QuickSlide functions
- Communications package
- Introductory seminars/webinars
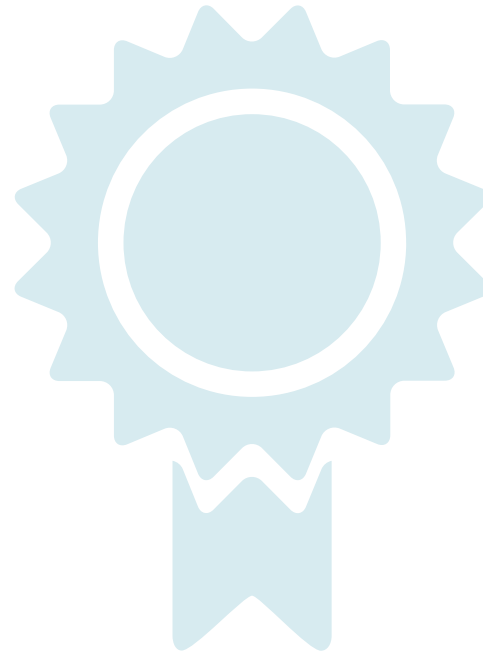

Our subscription models:

Includes updates, maintenance and support

....

> **For teams and departments**

Annual license by number of users.

> **For company-wide use**

Annual license for the entire organization based on the actual number of PowerPoint users. Additional workstations and user growth is covered by this.
